DETAILED ACTION

1. Receipt of the amendment filed October 02, 2006 is acknowledged.

Response to Arguments

2. Applicant's arguments with respect to claims 2-38 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al (US 6, 021,397)

Jones discloses a method for determining at least one financial strategy for assets to meet financial goals (Abstract,), comprising the steps of:

determining an outcome for each of a plurality of financial strategies (see column 5, lines 52 to column 6, line 13); and

selecting at least one of the financial strategies to meet the financial goals using a software-

implemented decision analysis and the outcomes for the financial strategies (see column 6, lines 14-39);

Jones disclose models and calculations to determine strategic outcomes (see column 6, line 7-20; and column 7, line 63 to column 8, line but fails to disclose that the model is based upon a monte carlo simulation. Since Jones provides a simulation module which provides additional analytics for the processing of raw simulated return scenarios, or the statistics of gaining a particular goal, It would have been obvious for Jones to provide various simulations to provide additional pertinent information. Thus such a modification would have been an obvious expedient to one of ordinary skill in the art.
